

Symantec™ Client Security

Proactively protects against blended threats through robust client protection, centralised management, and ease of administration

Overview

Symantec™ Client Security helps keep enterprise client systems safe by providing comprehensive and proactive protection against blended threats, spyware, unauthorised network access, and mass-mailer attacks, with virus and vulnerability-based detection. Simplified management of multiple, integrated security technologies allows organisations to maintain control of client systems, minimise productivity disruptions, and enhance client security.

Key Benefits

- Integrated security technologies proactively protect enterprise client systems from security risks and network intrusions
- **NEW!** Enhanced protection from spyware and adware, including:
 - Real-time protection to reduce the risk of spyware reaching the system
 - Automatic removal for easy disposal of security risks
 - Side-effect repair to clean up registry entries, files, and browser settings after hard-to-find spyware infection
 - Control over spyware settings via existing Symantec AntiVirus™ Corporate Edition management interface
- **NEW!** Generic Exploit Blocking enhances intrusion prevention capabilities, resulting in reduced time-to-protection after vulnerability announcements

- **NEW!** Optimised out-of-the-box firewall configurations simplify configuration efforts while minimising the risk of threats
 - **NEW!** Enhanced tamper protection guards against unauthorised access and attacks, protecting users from viruses that attempt to disable security measures
 - Backed by Symantec™ Security Response, the world's leading Internet security research and support organisation
-

Additional Features

- Centralised configuration, policy management, threshold alerting, and logging capabilities ease the administrative burden and offer a comprehensive view of the enterprise-wide client security posture
- Centralised network auditing enables system administrators to identify which nodes are unprotected and vulnerable to attack
- Administrators can tailor firewall settings to meet usability and organisational needs
- Location awareness enables the client firewall to adjust policies based on the system's location, to ensure policy enforcement regardless of how the system is connected to the corporate network
- LiveUpdate™ technology provides a single update for antivirus, firewall, and intrusion prevention which allows organisations to respond faster to complex security outbreaks

Data Sheet: Integrated Security Symantec™ Client Security 3.0

- Multiple security technologies interacting with one another ensure a coordinated response to maximise containment and recovery
- Installation and migration assistance includes pre-configured deployment options and a software uninstaller that helps minimise migration resources and costs

System Requirements

Symantec Client Security 3.0

Microsoft's Recommended System Requirements for Memory and Processor are Implied.

SYMANTEC CLIENT SECURITY

- Windows 2000 Professional;
Windows XP Home/Professional/Tablet PC
- 115 MB of disk space
- 128 MB of RAM
- Internet Explorer 5.5 SP2 or later
- Intel Pentium processor at 150 MHz
(Pentium II or higher recommended)

SYMANTEC ANTIVIRUS

- Windows 2000 Professional/Server/Advanced Server;
Windows XP Home/Professional/Tablet PC;
Windows Server 2003 Web/Standard/Enterprise
and Datacenter Editions
- 64 MB of disk space
- 55 MB of RAM
- Internet Explorer 5.5 SP2 or later
- Intel Pentium processor at 150 MHz
(Pentium II or higher recommended)

SYMANTEC ANTIVIRUS FOR 64-BIT WINDOWS CLIENTS

- Windows XP 64-Bit Edition Version 2003; Windows Server 2003 Enterprise and Datacenter 64-Bit Editions
- Internet Explorer 5.5 SP2 or later
- AMD/64 or Intel EM64T
- 70 MB of disk space
- 80 MB of RAM

SYMANTEC CLIENT SECURITY MANAGEMENT SERVER

- Windows 2000 Professional/Server/Advanced Server;
Windows XP Professional; Windows Server 2003
Web/Standard/Enterprise and Datacenter Editions
- 111 MB of disk space (65 MB of disk space for Symantec AntiVirus Corporate Edition server files and 46 MB of disk space for the client disk image)
- Optional installation of AMS2 Server
(requires 15 MB of disk space)
- 64 MB of RAM
- Internet Explorer 5.5 SP2 or later
- Intel Pentium processor at 150 MHz
(Pentium II or higher recommended)

NOTE: Symantec AntiVirus Corporate Edition does not support the scanning of Macintosh volumes on Windows servers for Macintosh viruses.

SYMANTEC CLIENT SECURITY

MANAGEMENT SERVER - NETWARE

- NetWare 5.x SP8, 6 SP5, 6.5 SP2 or higher
- 15 MB of RAM (above standard NetWare RAM requirements) for Symantec AntiVirus NLMs
- 116 MB of disk space (70 MB of disk space for Symantec AntiVirus Corporate Edition server files and 46 MB of disk space for the Symantec AntiVirus Corporate Edition client disk image)
- Intel Pentium processor at 150 MHz (Pentium II or higher recommended)

SYMANTEC SYSTEM CENTER

- Windows 2000 Professional/Server/Advanced Server; Windows XP Professional; Windows Server 2003 Web/Standard/Enterprise and Datacenter Editions
- Internet Explorer 5.5 SP2
- Microsoft Management Console (MMC) 1.2.
If MMC is not already installed, you will need 3 MB of free disk space (10 MB during installation)
- 36 MB of disk space
- 32 MB of RAM
- Intel Pentium processor at 150 MHz (Pentium II or higher recommended)

Additional requirements for Symantec System Center snap-ins:

- | | |
|--------------------------------------|-------|
| • Alert Management System Console: | 10Mb |
| • Symantec AntiVirus Snap-in: | 5Mb |
| • Symantec Client Firewall Snap-in: | 1Mb |
| • AntiVirus Client Firewall Snap-in: | 130Mb |
| • NT Client Install Tool: | 2Mb |

QUARANTINE CONSOLE

- Windows 2000 Professional/Server/Advanced Server; Windows XP Professional
- Internet Explorer 5.5 SP2
- Microsoft Management Console (MMC) 1.2.
If MMC is not already installed, you will need 3 MB of free disk space (10 MB during installation)
- 35 MB of disk space
- 64 MB of RAM
- Intel Pentium processor at 150 MHz (Pentium II or higher recommended)

QUARANTINE SERVER

- Windows XP Professional; Windows 2000 Professional/Server/Advanced Server
- 128 MB RAM
- 40 MB available disk space
- Minimum swap file size of 250 MB
- 500 MB - 4 GB disk space recommended for quarantined items
- Microsoft Internet Explorer 5.5 SP2 or later

SYMANTEC CLIENT FIREWALL ADMINISTRATOR

- Windows 2000 Professional/Server/Advanced Server; XP Professional; Server 2003 Web/Standard/Enterprise and Datacenter Editions
- 130 MB of disk space
- 80 MB of RAM

NOTE: If you are running Windows XP, system disk space usage will be increased if you have the System Restore functionality enabled. Please consult your Microsoft Operating System documentation on how System Restore works.
